

PROSTATE CANCER SCREENING

When detected early, prostate cancer has a 5-year survival rate of over 99%. However, early-stage prostate cancer often shows no symptoms. That's why screening is essential.

Wood County Hospital Physicians will be offering:

- **Prostate exams**
- **Prostate Specific Antigen (PSA) bloodwork**

Don't wait for symptoms— know your risk and take action!

Scan the QR code to register and for more details.
